**GEOGRAPHY & ENV PLANNING (GE)**

**GE 2002 Human Geography (3)**
Provides Geography and Environmental Planning majors an introduction to the field of human geography, with a particular focus on the various subfields and their relationship to the social sciences. A general introduction to the field, open to any student. Reviews key concepts, viewpoints and methods of cultural geographers in examining how human activity is organized. Springs.

**GE 2040 Digital Cartography (2)**
The basic elements of Cartography are discussed and illustrated with practical experience. Students learn the principles of effective digital mapping and become familiar with the types of problems that Geographic Information Systems.

**GE 2050 GIS I: Introduction to Geographic Information Systems (4)**
An introduction to the theoretical and applied aspects of Geographic Information Systems (QRCO) (TECO) (QRCO) (TECO).

**GE 3020 Geography for Educators (3)**
Provides students opportunities to master the fundamental concepts and varied geographic traditions (physical geography, human geography, and area analysis) in preparation for teaching at elementary, middle and high school levels. Utilizes the NH Department of Education curriculum frameworks and NCSS standards to identify content and instruction methods within geography courses and in geographic connections within other content areas. Limited to Teacher Certification majors only. Springs. (GACO)
Prerequisite(s): permission of instructor.

**GE 3030 Urban Geography (3)**
An examination of the evolution of the contemporary urban system, emphasizing the role of cities and metropolitan areas as concentrations of social and economic activity. Particular focus is given to the historical evolution of urban form and function, including patterns of land use, residential change, commercial activity, manufacturing and transportation. While the primary subject is the American city, some comparisons to international urbanization are made. Falls. (GACO)
Prerequisite(s): Junior status.

**GE 3050 GIS II: Advanced Geographic Information Systems (4)**
Advanced topics in understanding and using geographic information systems. Prerequisite(s): GE 2050 or GE 3270.

**GE 3080 Economic Geography (4)**
Introduces students to the major themes and issues addressed in critical economic geography. Focuses on development, resources, theories, and the impacts of economic systems across the global landscape. Gives students a greater appreciation and understanding of the myriad of cultural political and economics forces shaping our world. Fall of even years.

**GE 3260 The Physical Geography of National Parks (3)**
A survey of the physical geography of the United States through a sample of our National Parks. These Parks have within them examples of many diverse landforms and demonstrate the tectonic and geomorphic processes responsible for the evolution of landforms throughout the United States. Using the example of the National Parks, examines the tectonics of the Eastern and Western United States, the effects of alpine and continental glaciation and periglacial processes, and the impact of fluvial processes within the context of landscape regions such as the Appalachians, the Great Plains, the Rocky Mountains, and the Sierra-Cascades system. Unscheduled.

**GE 3300 Introduction to Hydrology (3)**
Emphasizes the surface and subsurface distribution of water and considers topics such as the hydrologic cycle, precipitation, overland flow, groundwater, soil moisture, evaporation and problems of contamination. Introduces the collection and analysis of hydrologic data. Falls. Prerequisite(s): GE 2001 or ESP 2150.

**GE 3970 Internship (1-6)**
Students engage in an individualized work program at an agency that emphasizes some aspects of planning, tourism, GIS or other related to their field(s) of study. Minimum time required is 10 hours/week for 1 semester. Repeatable for a maximum of 6 credits. Prerequisite(s): approval of the discipline’s Internship Program Coordinator.

**GE 4010 Remote Sensing and Digital Image Processing (4)**
An introduction to the basics of remote sensing, characteristics of remote sensors, and remote sensing applications in multiple academic disciplines and professional sectors. Covers remote sensing principles, aerial photography, digital image processing and interpretation, major remote sensing systems, image display and enhancement, information extraction, digital image data classification, and accuracy assessment. Not open to students who has earned credit for GE 3350. Falls and Springs.
Prerequisite(s): GE 2050.

**GE 4040 Topics in Geospatial Technologies (1-4)**
Introduces students to geospatial technologies and techniques used across various fields and disciplines. Examples might include topics in Advanced Geographic Information Systems, Geographic Information Sciences, Geomatics, Geodetics, Remote Sensing, Air Photo and Satellite Data or Surveying. Falls. May be repeated for credit with a different topic for a maximum of 3 times.

**GE 4050 Geospatial Technology Applications (4)**
Advanced methods, theories, and applications of geographic information systems. Prerequisite(s): GE 3050 or GE 3270.

**GE 4060 GIS Programming (4)**
Geographic Information Systems. Prerequisite(s): GE 2050.

**GE 4100 Geographic Information Systems Internship (1-4)**
Students engage in an individualized Geographic Information Systems Internship. Prerequisite(s): GE 2050 and permission of the instructor.
GE 4110  Topics in Regional Geography  (3)
Introduces students to 1 of the many regions of the world outside the United States. Examples might include formal regions such as a continent or a large nation, a functional region such as the Mediterranean or East Asia, or cultural regions such as the Arab world or Latin America. The emphasis is on the geographic and cultural diversity of the region. Fall of even years and Spring of odd years. (GACO) (WRCO) (GACO) (WRCO)

GE 4120  Topics in Human Geography  (3)
Introduces students to 1 of the fields of Human Geography. Examples might include Cultural Geography, Social Geography, Economic Geography, Medical Geography, the Geography of Religion, or the Geography of Sport. Fall of odd years.

GE 4140  Topics in Geographic Techniques  (3)
Introduces students to geographic techniques used in Geography and related fields such as Environmental Planning or the natural sciences. Examples might include topics in Advanced Geographic Information Systems, Geographic Information Sciences, Geomatics, Geodetics, Remote Sensing, Air Photo and Satellite Data, or Surveying.

GE 4150  Topics in Geography  (3)
A methodological study of the spatial aspect of such selected topics as the geography of sports, landforms education and map-making.

GE 4910  Independent Study  (1-3)
Background in geography through reading and research, supplementing previous course work in the field. A research paper, periodic conferences and an oral examination may be required. Consent required of the instructor who will supervise the independent study and the Department Chair.
